

The Greener Light Harpoon Gun has been carefully made and tested and if treated with reasonable care it will last indefinitely. Spare parts are very seldom required but they can always be obtained from stock. When ordering spare parts be sure to state the type of gun for which the parts are required and the Mark.

For oiling the gun use Webley Cleaner and a little of this should be put on the working parts, C, D, E, F and G as shown on the illustration. This oil should also be used for cleaning the barrel when the gun is in regular use. If the gun is to be stored away, or if it is used in very damp climates, the inside of the barrel should be coated with Gun Grease.

WEBLEY & SCOTT LIMITED
